

For security reasons, a system of session control has been integrated to Nutrilog Online. Below are the details about how it operates.

### 1. Normal disconnection from the “Logout” option

Click on your user name in the top right of the banner and select the “Logout” option.

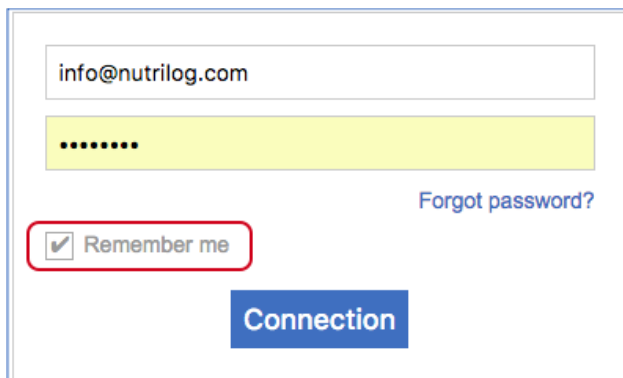

You will then be able to log back in from any other device.

### 2. Abnormal disconnection without using the “Logout” option

If you close your browser or the “Nutrilog Online” tab without disconnecting from the service, you will be able to immediately log back into the service from the same device and the same browser.

To log back in from a different device or from the same device but from a different browser, you will have to wait for 2 hours.

### 3. The “Remember me” check box

A screenshot of the Nutrilog login form. It features a text input field with the email address 'info@nutrilog.com', a password input field with a yellow background and masked characters '.....', and a 'Forgot password?' link. Below the password field, there is a checkbox labeled 'Remember me' which is checked and highlighted with a red rectangular box. At the bottom of the form, there is a blue button labeled 'Connection'.

If you do not check the box, you will have to identify yourself every time you want to connect, whatever the way you logged out.

If you check the box:

- In case of normal disconnection, you will have to identify yourself at the next connection to the service;
- In case of abnormal disconnection,
  - You will not have to identify yourself if you connect to the service within 2 hours from disconnection,
  - You will have to identify yourself if you connect to the service passed 2 hours from disconnection.
